## Web front-end developer with React

Skillful and master of React senior developer with 3 years of experiences in developing and implementing front-end architecture that have succeed in several E-commerce orders and tasks, Providing great responsive web applications by using react-hook to almost clients. Proficient in modern JavaScript(TypeScript), ReactJs(React-hook), Redux, and other methodologies. We are committed to user-friendly solutions writing clean and maintainable code. Cascading style sheet and interactive between view and React and Redux is the main powerful ability for me. If anybody want smart and cool front-end web application, please come to me. I will do my best.

## WORK EXPERIENCE

### Junior front-end developer

**Datacrops Technology Solutions, Inc,** 2020.6 ~ 2021.7

- With only two skills, HTML and CSS, perfect static design I have done. Sometimes I used sass and I ensured the pixel-perfect and high-code-quality.
- The type-script was usually used and cool material-theme was used. And by my own CSS,I created some interesting animations.

### Android Developer

**All Web n Mobile LLC,** 2021.10 ~ 2022.12

- By using Java and Android, In addition, some high AI technologies, Google map system was in the transport support system I built. You can call all cars, buses and trucks everywhere and orders and accepts or refuse. This can help people to use transportations more easily.

### Senior fullstack developer, Designer

**Symmertric IT Group,** 2023.1 ~

- I had to accept one task kind of E-commerce site. I used world's most popular word press themes, that name is wpbiggnor or wpastra. So and I coordinated with the marketing team to produce high-quality promotional materials that aligned with strategic marketing goals.
- Attend in building "material" theme v4.0 and that resulted in a 30% increase in customer engagement. so the result of assisted in the development of a large-scale web tamplate platform(MaterialX) was improving site performance by 40%.
